

Admission Arrangements for children with Special Needs

Admission arrangements for Children with Special Needs do not differ from those of any other children. However, we do encourage parents of children with additional needs to make contact with school at an early opportunity to discuss their child's requirements. This early communication enables the school to gather as much information as possible so that an informed and productive dialogue can begin at the earliest opportunity. Any additional support or provision can then be considered before the child joins the school.

In the event of over subscription, all children would be admitted according to the governors' admission policy (see the Admissions Policy).
